

the story of teeth -lrb- 6 -rrb- .

I **Mike** **have** **has** kept the good habit of having **my** **his** teeth cleaned ever since i **he** knew it could claim **my** **his** life if i **he** abruptly go to clean **my** **his** teeth after years of leaving them uncleaned . After **my** **his** still upright but " left - tilting " teeth crouched in **my** **his** mouth safely and soundly for another two years , another revolution erupted half a year after i **he** graduated and found a job . The revolution could be said a rudimentary one , which made **me** **him** decide eventually to eliminate all the betrayers and heretics in one action !.

The incident was caused by a molar . The location of the tooth was just next to the broken wisdom tooth that led to **my** **his** first visit to an american **dentist** . For some unknown reason , when i **he** was eating the other day , the tooth suddenly ached during the meal , and it was very painful . Unexpected i **he** heard a " crack " while i **he** was eating , and part of the tooth fell off !. I **he** could not remember eating anything hard ?!. I **he** rushed to the **dentist** , who said root canal therapy upon seeing it , your dental nerve had come out !.

I **he/Mike** did not know what root canal meant but thought the name was quite fancy . It was after i **he** began to receive it that i **he** found it really painful !. For example killing the nerves , and dealing with the dental crown ... I **He** asked the **dentist** then why **my** **his** tooth broke . After examining **my** **his** 25 teeth , the dentist told **me** **him** seriously that the teeth on the right side were somewhat " cross biting " due to the " parallel shift " of **my** **his** teeth , such that the upper and lower right teeth were always against each other . The wrong position had led to uneven abrasions , resulting in the broken tooth . I **he** asked what solutions are available ? The **dentist** said " correction . " Thus , three years after i **he/Mike** ran away from the " brigand orthodontist , " i **he** stepped into the orthodontist 's office again ... –

Hard work without talent is a shame , but talent without hardwork is a tragedy ! -lrb- are you a shame or a tragedy ?? or maybe a " shamgerdy ? " -rrb- .
